TROPICAL CYCLONE BULLETIN NR. 18 Typhoon JENNY (KOINU)

Issued at 11:00 PM, 03 October 2023

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TYPHOON "JENNY" MAINTAINS ITS STRENGTH WHILE MOVING OVER THE WATERS EAST NORTHEAST OF BATANES PROVINCE.

Location of Center (10:00 PM)

The center of the eye of Typhoon JENNY was estimated based on all available data at 305 km East Northeast of Itbayat, Batanes (21.7°N, 124.6°E)

Intensity

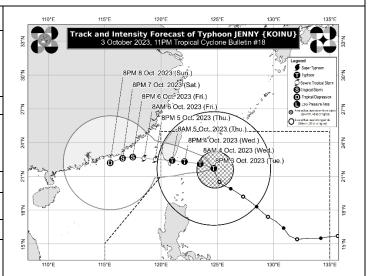

Maximum sustained winds of 155 km/h near the center, gustiness of up to 190 km/h, and central pressure of 950 hPa

Present Movement

North Northwestward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 560 km from the center

TROPICAL CYCLONE BULLETIN NR. 18 Typhoon JENNY (KOINU)

Issued at 11:00 PM, 03 October 2023

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT								
TCWS No.	Luzon	Visayas	Mindanao					
3	The northern portion of Batanes (Itbayat)	-	-					
Wind threat: Storm-force winds	m-force Range of wind speeds: 89 to 117 km/h (Beaufort 10 to 11)							
2	The rest of Batanes	-	-					
Wind threat: Gale-force winds	Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property							
Wind threat: Strong winds	Cagayan including Babuyan Islands, the northern portion of Isabela (Maconacon, San Pablo, Santa Maria, Divilacan), Apayao, the northeastern portion of Abra (Tineg, Lacub, Malibcong), the northern portion of Kalinga (Rizal, Pinukpuk, Balbalan), and Ilocos Norte	-	-					
	Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and propert	y						

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Forecast accumulated rainfall from tonight to tomorrow evening

100-200 mm: Batanes50-100 mm: Babuyan Islands

Forecast accumulated rainfall from tomorrow evening to Thursday evening

• 50-100 mm: Batanes, the northern and western portions of Babuyan Islands, and the northern portion of Ilocos Norte

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are possible especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

In addition, JENNY will continue to enhance the Southwest Monsoon and bring occasional rains over the western portions of Luzon in the next 3 days. For more information, refer to **Weather Advisory No. 7 for Southwest Monsoon** issued at 11:00 PM today.

MMSS-04 Rev. 0 / 15-08-2023

TROPICAL CYCLONE BULLETIN NR. 18 Typhoon JENNY (KOINU)

Issued at 11:00 PM, 03 October 2023 Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Moderate to significant impacts from storm-force winds may be observed within any of the areas under Wind Signal No. 3
- Minor to moderate impacts from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

The enhancement of the Southwest Monsoon by JENNY will bring **gusty conditions** for the next 3 days over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

- Tonight and tomorrow: The southern portion of Aurora, Bataan, Metro Manila, Occidental Mindoro, Kalayaan Islands, Romblon, most of CALABARZON, and portions of Bicol Region.
- Thursday: The southern portion of Aurora, Romblon, and portions of CALABARZON and Bicol Region.

HAZARDS AFFECTING COASTAL WATERS

- Under the influence of JENNY, a **Gale Warning is in effect** for the coastal waters along the seaboards of Northern Luzon. For more information, refer to **Gale Warning No. 5** issued at 5:00 PM today.
- In the next 24 hours, JENNY will also bring moderate to rough seas (1.5 to 3. m) over the coastal waters of northern Aurora. Mariners of motor bancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigating in these conditions, especially if inexperienced or operating ill-equipped vessels.

TRACK AND INTENSITY OUTLOOK

- JENNY is forecast to turn and move west northwestward in the next 12 hours, then westward thereafter. On the track
 forecast, the typhoon will make landfall over the southern portion of Taiwan between tomorrow late evening and on
 Thursday morning, then exit the Philippine Area of Responsibility (PAR) on Thursday afternoon or evening. Outside
 the PAR region, JENNY will continue moving westward over the Taiwan Strait and the coastal waters of southeastern
 China.
- The weakening trend is forecast to continue due to the increasing dry air entrainment and vertical wind shear. Land interaction during its passage over the rugged terrain of southern Taiwan will further weaken the typhoon. Once over the Taiwan Strait, additional cool dry air from the north will entrain into JENNY, resulting in continued weakening.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
